Geometry in Computer Vision

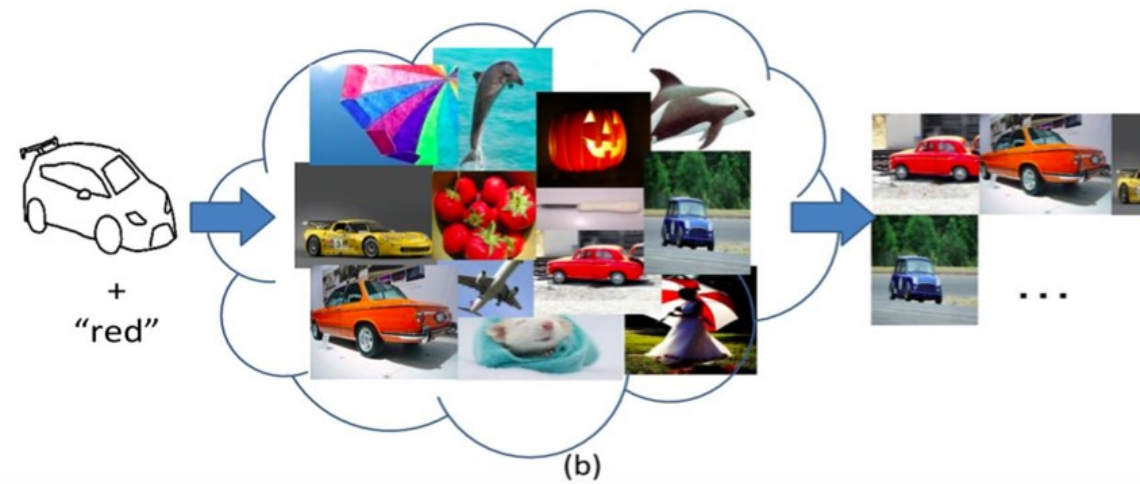

- Estimation on geometric manifolds
- Large-scale 3D reconstruction
- High quality 3D scanning using depth cameras
- Geometry at the intersection of SLAM and SfM.

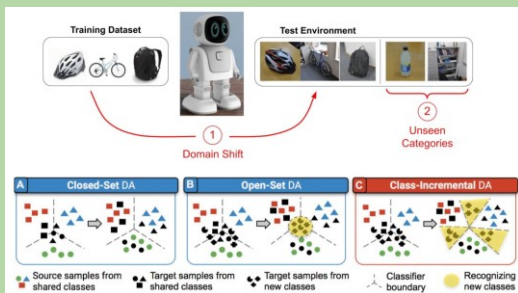

- New Framework: **rotation averaging**
- efficient, scalable, robust, and accurate
- better than state of the art

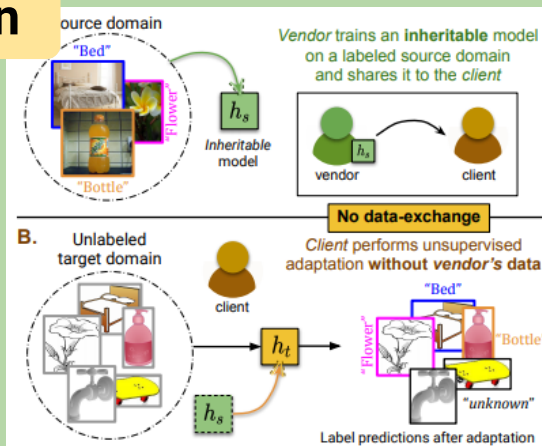

Cross-Modal Matching in Computer Vision

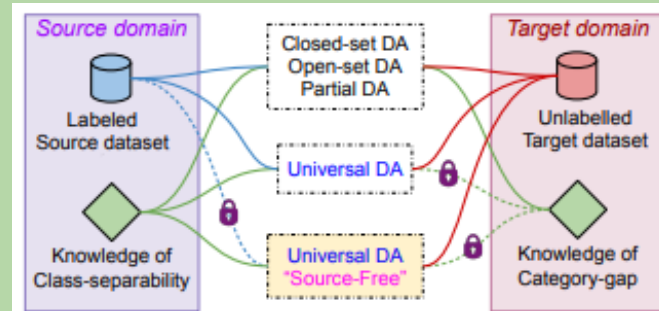

Domain Adaptation

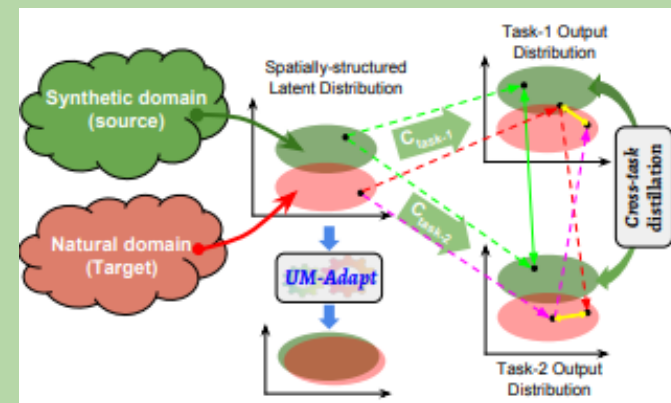

"Class-Incremental Domain Adaptation", Kundu *et al.*, ECCV 2020

"Towards Inheritable Models for Open-set Domain Adaptation", Kundu *et al.*, CVPR 2020

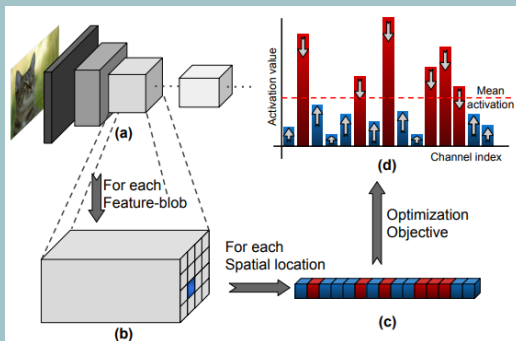

"Universal Source-Free Domain Adaptation", Kundu *et al.*, CVPR 2020

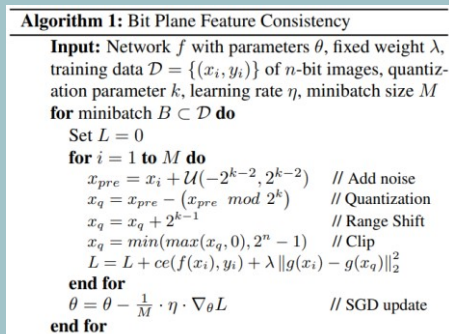

"UM-Adapt: Unsupervised Multi-task Adaptation using Adversarial Cross-task Distillation", Kundu *et al.*, ICCV 2019

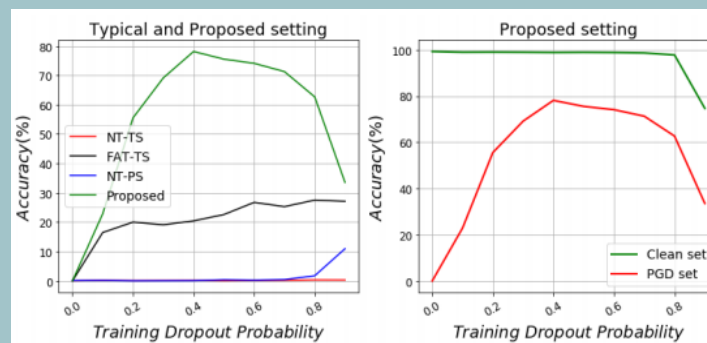

Adversarial Machine Learning

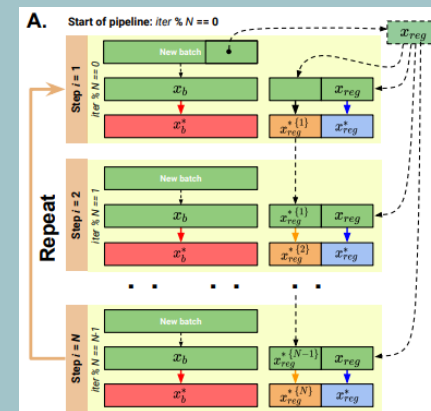

"Feature Disruptive attack", Adhitya *et al.*, ICCV 2019

"Towards Achieving Adversarial Robustness by Enforcing Feature Consistency Across Bit Planes", Sravanti *et al.*, CVPR 2020

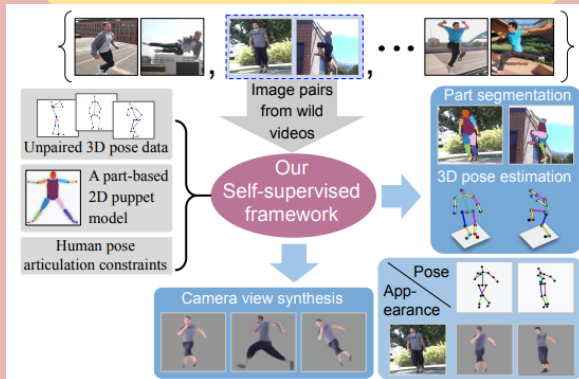

"Single-step Adversarial training with Dropout Scheduling", Vivek *et al.*, CVPR 2020

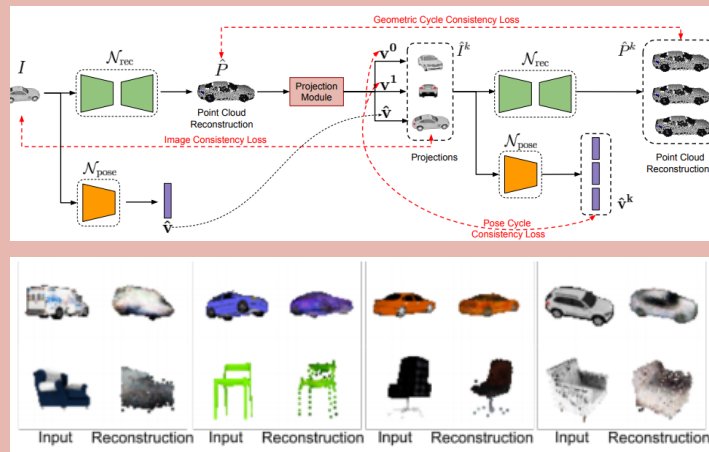

"Plug-And-Pipeline: Efficient Regularization for Single-Step Adversarial Training", Vivek *et al.*, CVPRW 2020

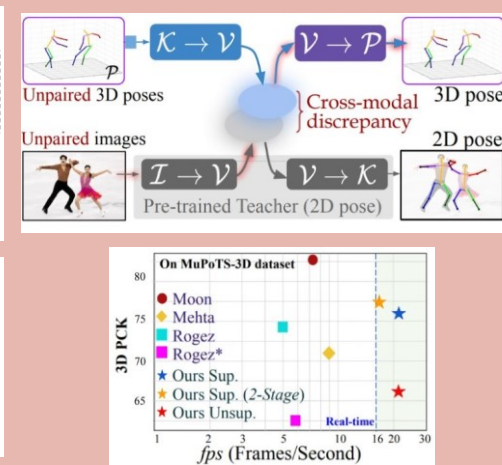

3D Computer Vision

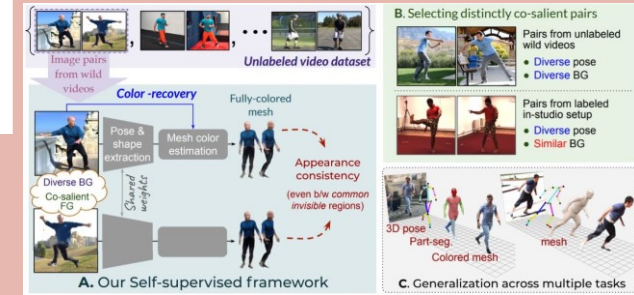

"Self-Supervised 3D Human Pose Estimation Via Part Guided Novel Image Synthesis", Kundu *et al.*, CVPR 2020

"From Image Collections to Point Clouds with Self-supervised Shape and Pose Networks", Navaneet *et al.*, CVPR 2020

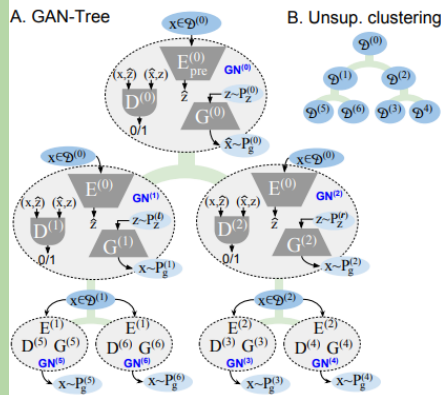

"Unsupervised Cross-Modal Alignment For Multi-Person 3D Pose Estimation", Kundu *et al.*, ECCV 2020

"Appearance Consensus Driven Self-supervised Human Mesh Recovery", Kundu *et al.*, ECCV 2020

Generative Adversarial Networks

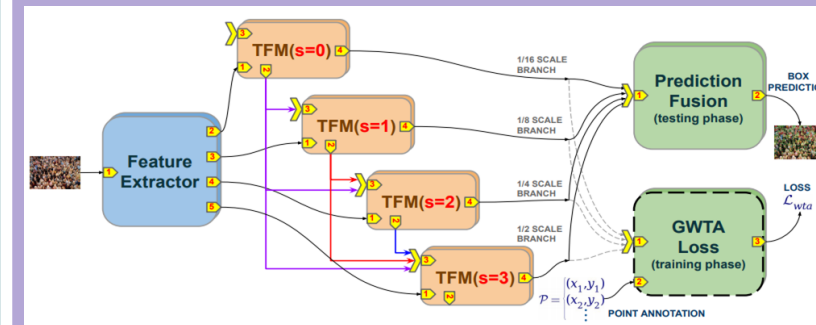

"GAN-Tree: An Incrementally Learned Hierarchical Generative Framework for Multi-modal Data Distributions", Kundu *et al.*, ICCV 2019

Computational Photography

"Towards Practical and Efficient High-Resolution HDR Deghosting with CNN", Prabhakar *et al.*, ECCV 2020

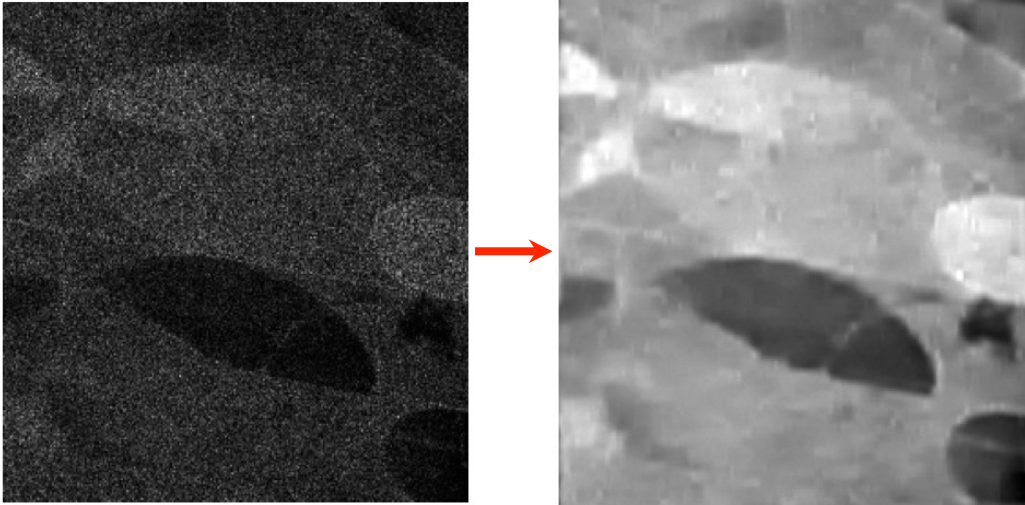

Crowd Counting

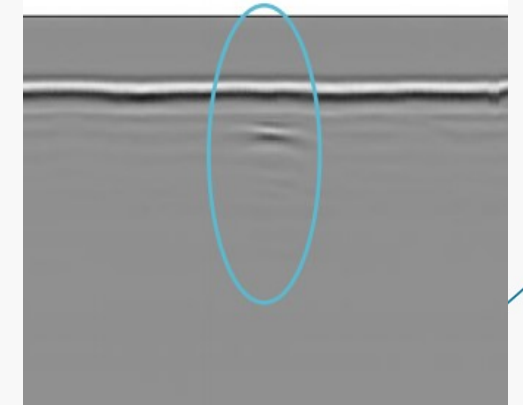

"Locate, Size and Count: Accurately Resolving People in Dense Crowds via Detection", Deepak *et al.*, TPAMI 2020

Image Restoration & Super-resolution Imaging

Restoration of satellite images

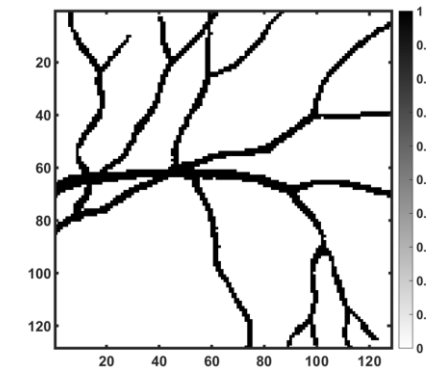

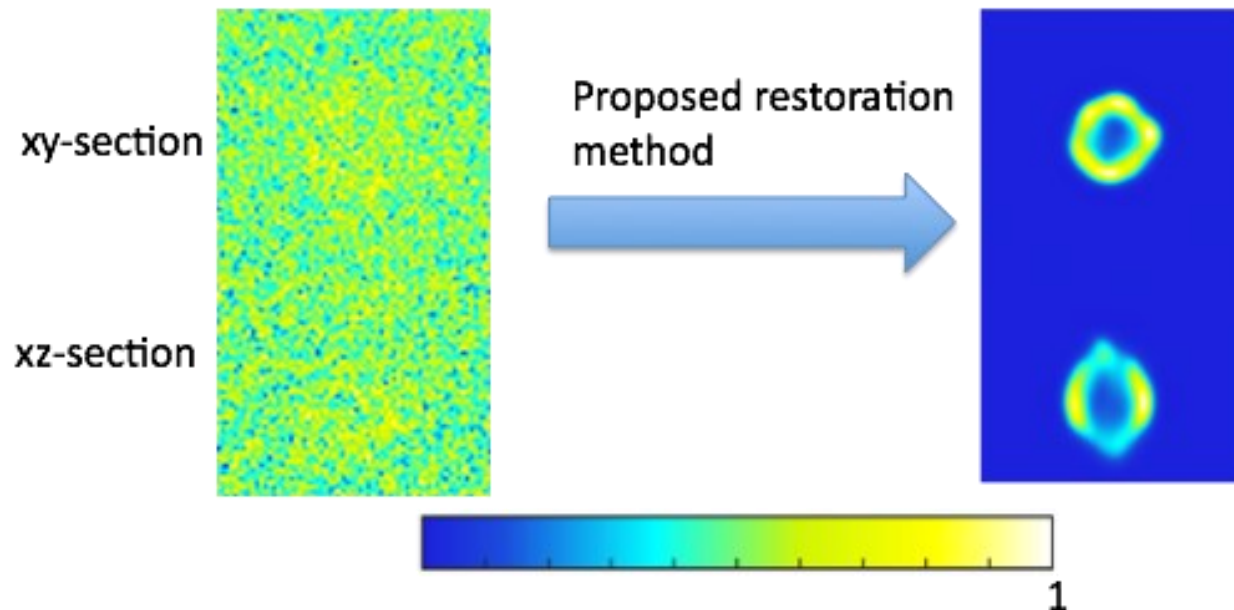

Ground penetrating radar EE & Civil Eng., IISc

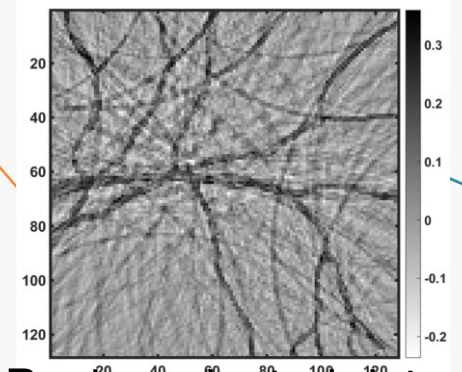

- Landmine detection
- Low-cost GPR, Low-frequency GPR? (800 MHz, instead of 1.5 GHz?)

Image Restoration in Optical Imaging

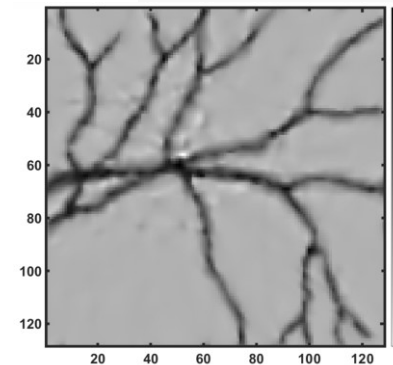

- Image restoration, structurally adaptive regularization
- Fluorescence microscopy & photoacoustic imaging
- Redesigning confocal microscopy system for reduced photodamage
- Optical systems modeling and optical telescropy

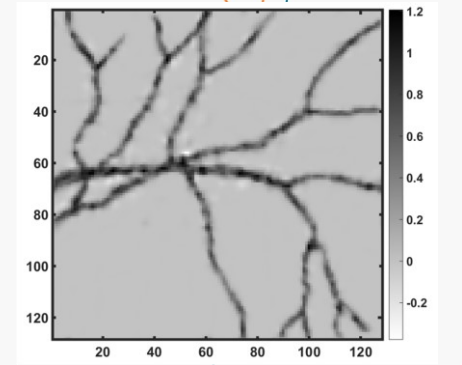

Phantom model

Back-projected data from 32 transducers

Second-order TV
(most widely used)

Intensity augmented
second-order TV
(our contribution)

Improved regularization in photo-acoustic imaging

Fast and Scalable Algorithms

- Image denoising, deblurring, inverse problems
- Sensor network localization from range data
- Multi-view registration from range scans
- Large-scale convex optimization algorithms
- Fast approximations of nonlinear filters with provable accuracy guarantees

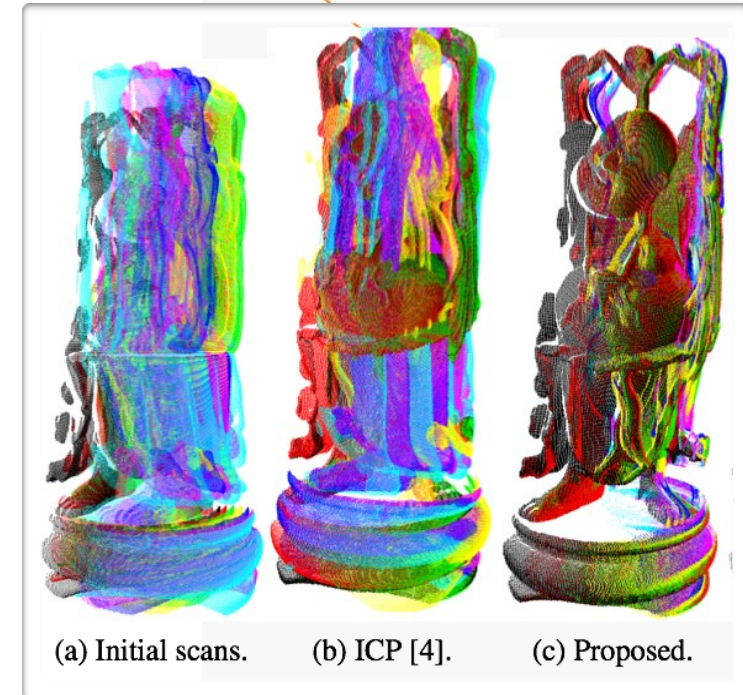

Input image(876×584).

Bilateral output. (Time=42.4sec)

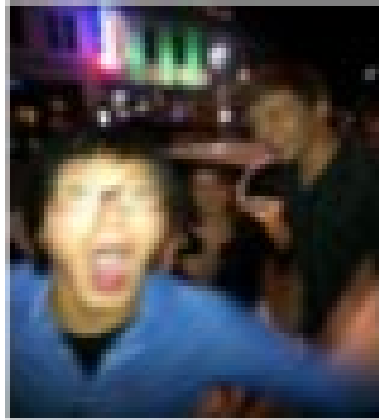

Approximation. (Time=1.229sec, RMSE=1.76)

- Novel optimization algorithms and solvers for registration
- Applications in Computer Vision, Graphics, and Sensor network localization
- Novel combinatorial characterization of the rigidity (uniqueness) of registration over the Euclidean group

Image and Video Quality Assessment

- Virtual Reality – User experience
- Models of visual quality of 360 degree 3D images/videos
- Visual discomfort model (head mounted displays)
- Deliver better user experience
- Methods for camera captured images with authentic distortions
- Low light/improper exposure combined with noise and blur
- Perceptual trade-off in video streaming (rebuffering vs. compression)

Document Image Processing & Assistive Technologies

Input

||| ஸ்ரீ வத்தில பணி புரிகின்றனர்

Mean character level
accuracy
is 25 %

Our DNN model designed to improve the quality of
low-resolution degraded Tamil document images

Output

ஸ்ரீ வத்தில பணி புரிகின்றனர்

Mean character
level accuracy
is 64 %

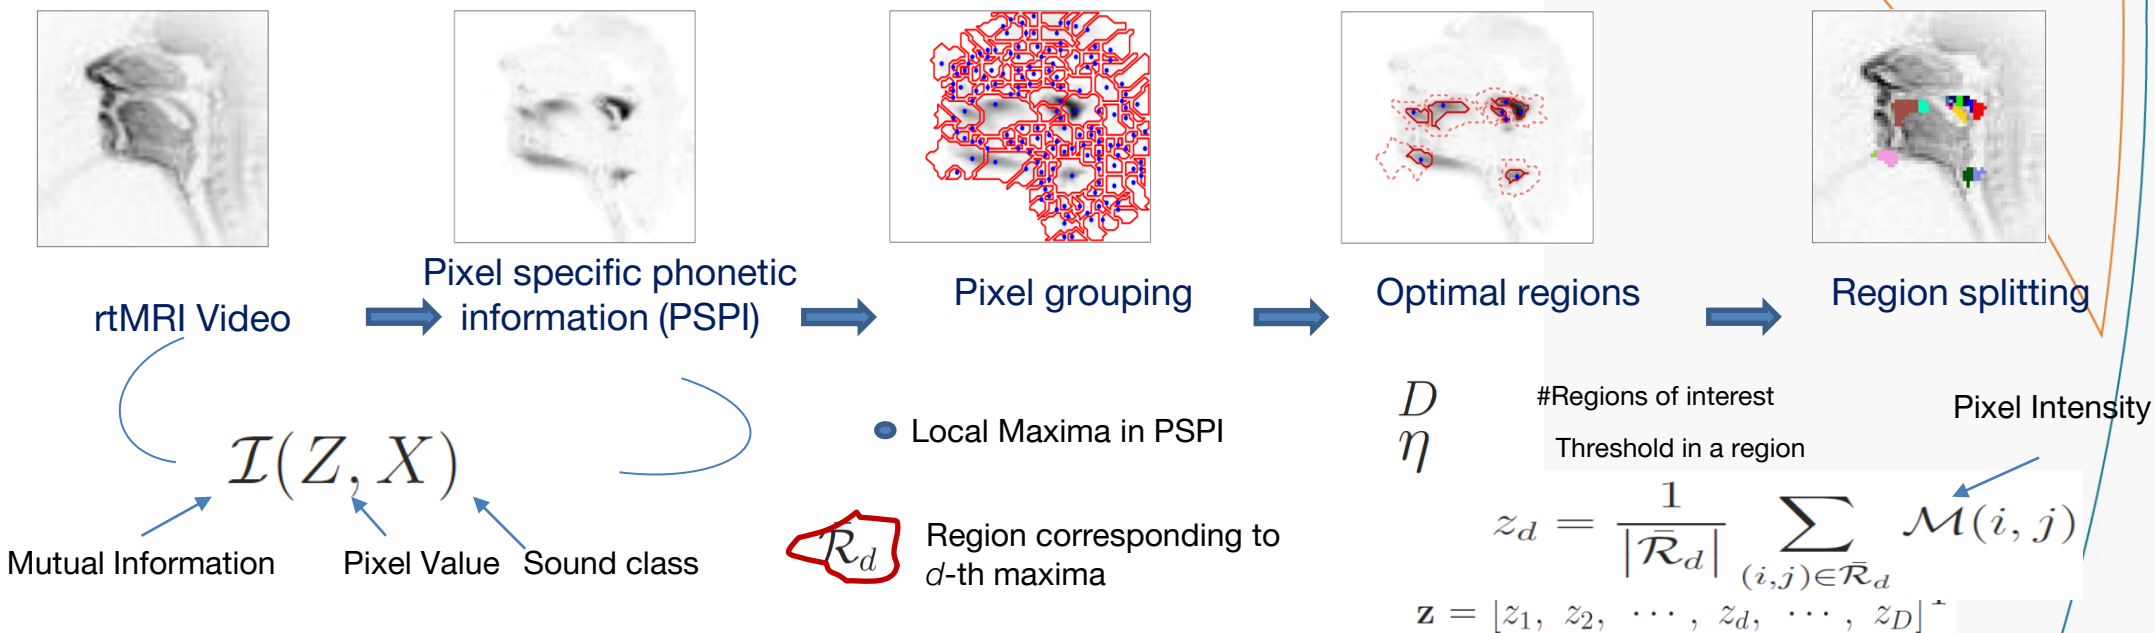

- Online handwriting recognition system for Indian languages
- OCR systems for the blind
- Text-to-speech synthesis

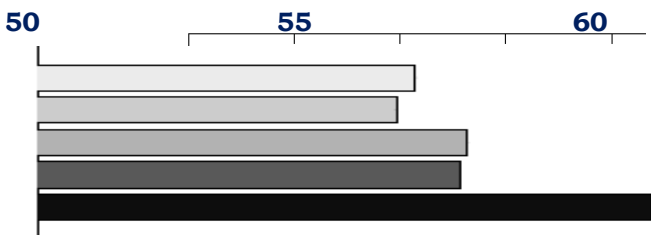

Speech Generation & Speech Processing

Deriving acoustic representations from real-time magnetic resonance imaging (rtMRI) videos of speech

Information-theoretic vocal tract region selection

Phoneme Recognition Accuracy (%)

- Acoustic Features (ACF)
- Baseline Articulatory features (BAF)
- Optimal Articulatory features (OAF)
- ACF + BAF
- ACF + OAF

\mathcal{Z}_d -splitting

rtMRI derived articulatory features and acoustic features are complementary
